Question 1.2

```
[8]: n = 42
```

Type your answer here, replacing this text.

Question 1.3

```
[9]: print("Hello World")
```

```
Hello World
```

Type your answer here, replacing this text.

Question 1.4

```
[10]: print("Hello World")
```

```
Hello World
```

Type your answer here, replacing this text.

Question 2.2 Modify the doc string (Textbook paragraph) in the `add_two_numbers` functions to provide a description of the function's interface. Make sure to re-run the python cell after you added a docstring to the function.

Hint: If you still see an empty string in the cell below, make sure to re-run the python cell where you implemented the function

```
[ ]: add_two_numbers.__doc__
```
